

No.	Task	Status
1	Voice agents to reduce calls handled by executives	🟢 In Progress
2	Activate AI agents for data capture via WhatsApp	🟢 In Progress
3	Begin automation of Fidatos so completed cases are passed to assignment. Subsequently, unification of the pre-case and data intake "cabin" with automatic HMM data capture	🟡 In Progress (until week of the 20th)
4	Automatically close road assistance cases via WhatsApp service closure event	🟡 In Progress
5	Automation of HMFM case closure using WhatsApp channel with provider-side closure (particularly for BBVA)	🟦 Planned
6	Automation of data capture for nursing cases	🟢 In Progress

7	Automation of Campaign/plan categorization for Multi-assistance pre-cases	🟦 Planned
8	Automation of Reimbursement workflow	🟤 In Progress
9	Migrate reimbursement portal to Xperience Cloud	🟦 Planned (long term)
10	Automate sending of reimbursement portal link to end user after agent classifies case as reimbursement	🟦 Planned
11	Gradually extend Fidatos profile to all Road Data Capture	🟡 In Progress (short term)
12	Enable a specific Ambulance template with basic data (2-3 fields) so the process moves quickly to Assignment and providers can be searched	🟠 In Progress (until week of the 9th)
13	Allow Salesforce to search for a customer's location based on captured data	🟦 Planned (until week of the 20th)
14	Activate omni for case closure	🟦 Planned
15	Complete migration of Inves from TM1 to Salesforce	🟢 In Progress (week of 6-7)
16	Capture Banorte cases from AIO API	🟡 In Progress
17	Validate policy status (active, expired, cancelled, etc.) for applicable cases	🕒 To be confirmed
18	Train staff on querying the number of events/assurances a beneficiary has had to validate eligibility	🕒 To be confirmed
19	Review fields/sections in data capture that can be automated during case loading	🕒 To be confirmed
20	Improvement so that when the caller and patient are the same person, the information is not transcribed again	🕒 To be confirmed

Strategic Context

 TELASIST is the 6th largest Salesforce customer in LATAM and holds a unique position in the region:

-  Only BPO (Business Process Outsourcer) in the Salesforce strategic portfolio for Mexico
-  Largest Contact Center operating on Amazon Connect (AWS)
-  Actively evaluating Amazon Bedrock and Eleven Labs as alternative voice AI providers — making this a **direct competitive situation** for Salesforce
- The POC represents Telasist's bet on Salesforce to improve CX, agent productivity, and first-level data capture via voice

Telasist operates ~325,000 inbound calls/year across 7 major client campaigns (plus 150+ additional campaigns). This table covers 95% of all calls received.

Total Call Volume by Campaign

Month	Coppel	GNP	Invex	Multiasist .	Viva Aerobus	Guros	ADO
Jul-25	8	2	—	1	866	145	741
Aug-25	17	1	—	1	13,496	543	2,120
Sep-25	35	—	—	1	12,731	442	1,968
Oct-25	122	—	—	—	10,186	609	3,592
Nov-25	100	—	—	1	9,492	858	2,472
Dec-25	87	1,411	—	1	11,042	737	2,944
Jan-26	51	1,946	—	5	8,759	623	1,636
Feb-26	6,167	2,049	—	1,309	10,768	502	1,883
Mar-26	11,332	2,106	—	4,129	15,013	2,018	1,424
Apr-26	10,836	1,389	—	4,026	6,823	3,251	1,602
May-26	11,163	1,830	30,018	4,220	7,620	14,799	1,561
Jun-26*	7,129	1,332	22,714	2,856	5,133	38,230	885
Total	47,047	12,066	52,732	16,550	111,929	62,757	22,828

Notes: Not all calls result in a case. Some campaign data is incomplete as they are being migrated. These are the most representative campaigns — there are 150+ additional campaigns not included. This table covers 95% of received calls.

Grand Total: ~325,909 calls

Campaign Analysis & Agentforce Routing Recommendation

Agentforce Voice — Recommended Campaigns

These campaigns have **high automation potential** due to simple, structured flows and high call volumes:

Campaign	Est. Monthly Calls	Avg. Duration	Flow Complexity	Key Actions	Agentforce Recommendation
Campaña Águila	~107/mo (426 in 4 mo)	6 min	Simple	Send email, create case	✅ Agentforce Voice — ideal pilot
Campaña Coppel	~3,921/mo	6 min	Medium	Confirm data, geolocation, create case	✅ Agentforce Voice — high volume
Campaña Viva Aerobus	~9,327/mo	TBD	Medium-High	Refund processing, reservation lookup, case creation	✅ Agentforce Voice (hybrid)

Agentforce Digital Channel — Recommended Campaigns

These campaigns may benefit more from async or chat-based interactions:

Campaign	Est. Monthly Calls	Rationale
Multiasist.	~1,379/mo	Mixed flow — evaluate for digital self-service
GNP	~1,005/mo	Insurance-related; structured Q&A suits digital
ADO	~1,902/mo	Bus/transport queries — self-service chat potential
Guros	~5,230/mo	Growing volume — evaluate digital deflection
Invex	~4,394/mo (growing fast)	Finance/banking queries — may require voice validation

Use Case Detail: Agentforce Voice

Use Case 1 – Campaña Águila: Overflow Call Management

Campaign: El Águila | **Volume:** 426 calls / 4 months | **Avg. Duration:** 6 min

Problem Today: When a customer calls El Águila's contact center during peak periods, the call is transferred to Telasist where a human agent manually captures data — causing wait times, agent dependency, and variable per-minute costs.

With Agentforce Voice:

- Inbound call is received via Amazon Connect → forwarded to Agentforce Voice
- Agent automatically greets, captures service request data in Spanish
- Sends confirmation email to customer
- Creates a Case in Salesforce automatically
- Simple, end-to-end automated conversational experience

 **Recommended for:** First pilot — low complexity, measurable impact, clear ROI

Use Case 2 – Campaña Viva Aerobus: Refund Request Processing

Campaign: Viva Aerobus | **Volume:** ~111,929 total calls | **Avg. Duration:** TBD

Problem Today: Refund calls are emotionally charged (cancelled flights, billing disputes) and fully dependent on human agents to look up reservations, open cases, and guide customers — high handle time and cost.

With Agentforce Voice (Hybrid Model):

- Inbound call received → Agentforce Voice handles transactional layer
- Agent identifies customer, looks up reservation in Salesforce
- Opens refund case and sets expectations on resolution timeline
- Offers self-service portal link via SMS/WhatsApp for status tracking
- Human agent escalation available for complex or emotional cases

 **Recommended for:** Phase 2 — highest volume campaign, strategic CX differentiation

Use Case 3 – Campaña Coppel: Service Request Triage

Campaign: Coppel | **Volume:** ~47,047 total | **Avg. Duration:** 6 min

Problem Today: Agents must manually confirm customer identity, validate geolocation, and log case details — repetitive, high-volume, low-complexity interactions.

With Agentforce Voice:

- Inbound call → Agentforce Voice confirms customer identity via CSAT/data validation
- Captures geolocation (address, coordinates or reference)
- Creates a Case in Salesforce with all captured data
- Routes to human agent only when complexity requires it

 **Recommended for:** Phase 2 — high volume, clear data capture structure

Internal Use Case – Agentforce for Telasist Employees

Context: Beyond serving their clients, Telasist can leverage Agentforce internally to optimize their own operations.

-  **Agent Assist / Knowledge:** Agentforce surfaces answers and recommended actions to human agents during live calls, reducing AHT (Average Handle Time)
-  **Auto-Summarization:** Post-call summaries generated automatically in Salesforce Cases — eliminates manual ACW (After Call Work)
-  **Supervisor Coaching:** Real-time sentiment analysis and flag escalations for supervisors
-  **Onboarding New Campaigns:** Agentforce can accelerate the onboarding of new client campaigns by auto-generating call flows from

TELASIST - Agentforce Voice POC	Partner Voice Call CC Voice POC	—	Active

Technical Architecture

Current Stack:

- Amazon Connect (AWS) as telephony provider
- Salesforce Service Cloud + Agentforce (Foundations + Data Cloud + Flex Credits)
- Integration: **Partner Voice Forwarding for Agentforce Voice** — AWS calls Salesforce-assigned number

Key Technical Note:

Telasist has agreed to use a **US phone number** to enable the Agentforce Voice pilot, as Partner Voice Forwarding currently requires a US/Canada Long Code SKU. CPQ rule #12VY restricts quoting these SKUs for non-US billing addresses — an escalation and override process is underway.

Competing Alternatives Being Evaluated: Amazon Bedrock, Eleven Labs

Next Steps

 Customer Urgency

IMPORTANT — AI Voice Agents — Email received from Jose Luis Hidalgo (jose.hidalgo@telasist.com)

The customer needs **today, by end of day**, a clear answer on the implementation of Voice Agents. They need them running **by end of the month**.

This project is **critical to their operations** and has **full visibility from Telasist's Board of Directors**.

Immediate action: [@Jose Andres Alvarez](#) will send a response to the customer, copying Anita, to provide **clear next steps**.

- ☐ Define average call duration for remaining campaigns (Viva Aerobus, Invex, Guros, ADO)
- ☐ Map each campaign to Agentforce Voice vs. Digital Channel routing
- ☐ Confirm consumption plan estimates (minutes/month per campaign)
- ☐ Resolve CPQ rule #12VY override to unblock POC quoting
- ☐ Finalize internal Agentforce use case scope with Telasist operations team
- ☐ Submit LATAM TA&B Engagement Intake Process for official POC kickoff
